

Python & MySQL

UTOMO BUDIYANTO

Requirements

MySQL Database Server (<https://www.mysql.com>) atau XAMPP (<https://www.apachefriends.org/index.html>)

Install MySQL Connector/Python melalui Command Prompt sbb:

- \$ pip install mysql-connector-python

Connect to MySQL

```
mysql_connect.py > ...
1  import mysql.connector
2
3  from getpass import getpass
4  from mysql.connector import connect, Error
5
6  try:
7      with connect(
8          host="localhost",
9          user=input("Enter username: "),
10         password=getpass("Enter password: "),
11         database="ub1",
12     ) as connection:
13         print(connection)
14 except Error as e:
15     print(e)
```

TERMINAL PROBLEMS OUTPUT DEBUG CONSOLE

1: powershell

PS F:\python-src> python .\mysql_connect.py

Enter username: root

Enter password:

<mysql.connector.connection.MySQLConnection object at 0x00000202DC97DC70>

Create a Database

```
mysql_create_db.py > ...  
1  import mysql.connector  
2  
3  from getpass import getpass  
4  from mysql.connector import connect, Error  
5  
6  try:  
7      with connect(
